

FOR IMMEDIATE RELEASE

## IKEA recalls KVIBY chest of drawers for repair

SINGAPORE, September 30, 2008 – IKEA kindly asks customers who have a KVIBY chest of drawers with date stamp 0817 or earlier to contact Customer Service at 6786 6868 or the Exchange and Returns Counter in the store, to receive a repair kit by post, free of charge. The kit comprises six drawer knobs and fixing screws.

The date stamp appears on a label attached to the underside of the chest of drawers.

IKEA has received customer reports that a glass drawer knob has broken either during assembly or in use, causing injury. The breakages are due to over tightening the screw fitting used to fix the drawer knob to the drawer front.

All KVIBY chest of drawers produced with date stamp 0818 (yyww) and onwards are supplied with the improved replacement fittings.

We do not compromise on product safety and therefore we recommend all customers concerned to replace the KVIBY fittings.

We apologise for any inconvenience this may cause.
