

## CASE Advisory to all consumers

CASE would like to alert all consumers to a recent press release by the Health Sciences Authority regarding the danger of consuming brand of candy called "Mentalk". On 30 May 2008, HSA detected the undeclared chemical substance aminotadalafil in "Mentalk" candy. Aminotadalafil can cause serious adverse reactions such as heart attacks and strokes in susceptible individuals. HSA would like to urge the public not to buy or consume this product. If in possession of such product, they should throw this product away, and if consumers feel unwell after consuming this product, they should seek medical attention immediately. If consumers find any of those items on the shelf of any retailer, they can either alert H.S.A or call CASE about the matter.

For recent newspapers article on this product, please refer to <http://www.channelnewsasia.com/stories/singaporelocalnews/view/350990/1/.html>

(Note: "Mentalk" candy can be purchased through the internet website [www.mentalk2u.com](http://www.mentalk2u.com))
