CASE launches Fuel Kaki to facilitate comparison of effective prices of retail fuel for consumers

The Consumers Association of Singapore ("CASE"), supported by the Competition and Consumer Commission of Singapore ("CCCS"), is launching Fuel Kaki, a retail fuel price comparison website, to facilitate comparison of effective prices of retail fuel for consumers. The website will give motorists access to one-stop information on retail fuel prices and promotions in Singapore and the estimated effective prices that they will be paying. Fuel Kaki is accessible at https://fuelkaki.sg/ from 13 January 2020.

**Background**

According to CCCS\(^1\) Market Inquiry on Retail Petrol\(^2\) Prices in Singapore published in 2017\(^3\) ("the CCCS inquiry"), consumers who monitor and compare prices can enjoy substantial savings. The CCCS inquiry also found that the promotion schemes offered by the different petrol retailers are not easily comparable due to differing terms and conditions. CCCS recommended developing of a price comparison web portal and/or mobile application to improve the transparency of the effective retail petrol prices\(^4\) that consumers pay. This will help consumers to make better informed purchasing decisions and encourage greater competition amongst the petrol retailers in Singapore.

**Fuel Kaki**

In line with CASE’s mandate to educate and empower consumers, CASE, together with CCCS, engaged the relevant industry players to provide information on their respective retail fuel\(^5\) prices and promotions. CASE is pleased to have the support of ExxonMobil Asia Pacific Pte Ltd which owns the network of Esso stations in providing the necessary information for the website. As for the other retailers, CASE will endeavour to check on such pricing and promotion information and update the website directly in a timely manner.

---

\(^1\) At the time of the publication of the market inquiry report, CCCS was known as the Competition Commission of Singapore ("CCS").

\(^2\) Diesel was not within the scope of the CCCS inquiry.

\(^4\) Effective retail price refers to the price a motorist will pay after taking into consideration discounts, rebates and cashback offered by loyalty programmes and promotions.

\(^5\) For the purpose of this website, retail fuel refers to diesel, Octane 92, Octane 95, Octane 98 and other premium petrol grades.
Fuel Kaki will allow users to:

- Compare the listed fuel prices across different fuel retailers;
- View loyalty programmes and promotions (e.g. discounts, rebates and cashback) offered by the various fuel retailers and other loyalty partners such as banks and payment platforms; and
- Estimate the effective price per litre that they will pay after factoring in available instant discounts.

Fuel Kaki is developed as a responsive website accessible on desktop and mobile, allowing motorists to have access to it on-the-go.

Please refer to Annex A for screenshots of the website.

Mr Melvin Yong, Vice-President, CASE, and Chairperson, CASE’s Consumer Empowerment Taskforce said: “Fuel makes up a significant portion of a motorist’s monthly expenses. With so many different credit card discounts and promotions, it can be challenging for motorists to make effective comparison. Fuel Kaki aims to provide motorists with timely information on pump prices and promotions for easy comparison, thus helping motorists to stretch their dollar when they refuel.”

Figure 1.2 – Desktop Version
Note: Screenshots from this point are displayed in Mobile Version only.

2.0 Promotions - View loyalty programmes and promotions (e.g. discounts, rebates and cashback) offered by the various fuel retailers and/or partners

Figure 2.0

Users will be able to view the types of loyalty programmes and promotions offered by each fuel retailer by selecting the respective tabs.
3.0 Price Estimator - Estimate the effective price per litre that they will pay after factoring in available instant discounts.

Figure 3.0

4 steps are all it takes for users to calculate the effective price per litre they will be expected to pay when refuelling.
Users can select multiple fuel retailers they would like to compare.
**Figure 3.2 - Step 2: Select Fuel Grade**

Users can select only one fuel grade.
Users can choose to view the type of promotions offered by the fuel retailers by selecting the applicable options provided.
Figure 3.2.1 - Step 3: Select Promotion Type

Users will be able to view the effective price they will pay by selecting their preferred credit cards or partners.
Users will be able to view the nett price per litre after applying the ‘Instant Discounts’ offered by loyalty programmes or promotions.
Users will be able to view the estimated total savings they can get for their fuel purchase at the different fuel retailers.

Total Discount = Instant Discounts + Conditional Discounts

Conditional discounts apply only when they meet the qualifying conditions offered by loyalty programmes or promotions. For example, spending above a certain amount or rebates offered when they pay with partnering credit cards.
